

Anglais langue seconde - 4<sup>e</sup> année

Écriture Voie B

Tâche

### Directions

After having familiarised the student with the vocabulary about animals (habitat, adjectives, verbs and adverbs) with different listening and reading activities, ask them to describe an animal of their choice by following the guided model.

EXAMPLE

# My animal report

A. Draw an animal of your choice.

B. Describe your animal, where it lives and what it eats using descriptive words.

The animal I chose is a shark. Sharks are very interesting because they have to keep moving all the time. Sharks live in the ocean. There are many kinds of sharks. They usually eat fish and algae, but sometimes they eat plastic, by mistake. Sharks are wild animals. They do not make good pets. They can swim very fast. Faster than a human!

C. Write a few interesting facts about your animal.

There are 465 different species of sharks.

D. Why did you choose this animal?

**C. Write a few interesting facts about your animal.**
